

Eco Green-Power Ltd

Address: No. 1 Icery Road,
Forest Side
Tel: 670 2739/676 5555/5448 1444

26th October 2016

Eco green power is a private company incorporated in Mauritius on May 30th, 2016 .The main purpose of this private company is to help resolve demanding environmental issues in Mauritius. We look for opportunities to reduce the environmental effects of operations, and promote the protection of a sustainable global environment.This recycling company has come up with the idea of introducing a crushing machine for PET bottles.

I am pleased to forward you the project which is meant for the collection of PET bottles which is destroying our planet.

It is high time to clean up.

Do not hesitate to contact us for any additional information.

Yours Sincerely,

R. Sewbalak

Danger of Plastic Bottles

- **Causing floods**

Plastic rubbish that falls on the road gets washed away into the nearby water reservoirs, canals, and drains, leading to their choking up and overflowing.

- **Endangering marine lives**

Plastic bottles are responsible for destroying our coral reefs and increasing the death of marine animals.

- **Destroying the beauty of our seas**

Plastics products are often seen floating on the top of our seas. The beauty of our sea will definitely be endangered.

- **Destroying the beauty of lands**

Most of the plastics products either end up lying stagnant in landfills, leaching dangerous chemicals into the ground, or they infiltrate our streets as litter
